CELL CYCLE CONTROL AND GENOMIC INSTABILITY IN CANCER

Overview: Cell cycle control and genomic instability T.D. Tlsty	1-2
P53, cell cycle control and apoptosis: Implications for cancer M.B. Kastan, C.E. Canman, and C.J. Leonard	3-15
Cell cycle regulation in response to DNA damage in mammalian cells: A historical perspective J.P. Murnane	17-29
Cell cycle checkpoints and DNA repair preserve the stability of the human genome W.K. Kaufmann	31-41
Genomic instability due to germline p53 mutations drives preneoplastic progression toward cancer in human cells M.A. Tainsky, F.Z. Bischoff, and L.C. Strong	43-48
A role for genomic instability in cellular radioresistance? W.F. Morgan and J.P. Murnane	49-58
Genetic instability as a consequence of inappropriate entry into and progression through S-phase A. Almasan, S.P. Linke, T.G. Paulson, L.-C. Huang, and G.M. Wahl	59-73
Instructions for authors	75-76

TRANSGENIC MICE

Transgenic and gene knockout mice in cancer research J.L. Viney	77-90
Assessing new anti-tumour agents and strategies in oncogene transgenic mice H. Thomas and F. Balkwill	91-95
Utilization of transgenic mice in the study of matrix degrading proteinases and their inhibitors R. Khokha, D.C. Martin and J.E. Fata	97-111
Transgenic mice and squamous multistage skin carcinogenesis K. Brown and A. Balmain	113-124
Murine models of neoplasia: functional analysis of the tumour suppressor genes <i>Rb-1</i> and <i>p53</i> A.R. Clarke	125-148
Apoptosis, cancer and the p53 tumour suppressor gene J.M. Lee and A. Bernstein	149-161
Instructions for authors	163-164

CONTENTS VOL. 14, No. 3, September 1995**INTEGRINS IN CANCER**

Integrin-mediated signal transduction in oncogenesis: An overview S. Dedhar	165-172
Fibronectin and integrins in invasion and metastasis S.K. Akiyama, K. Olden and K.M. Yamada	173-189
Involvement of integrins in cell survival R.C. Bates, L.F. Lincz and G.F. Burns	191-203
Growth factor regulation of integrin-mediated cell motility K. Matsumoto, B.L. Ziober, C.-C. Yao and R.H. Kramer	205-217
The $\alpha 6 \beta 1$ and $\alpha 6 \beta 4$ integrins in human prostate cancer progression A.E. Cress, I. Rabinovitz, W. Zhu and R.B. Nagle	219-228
Integrin expression in non-small cell carcinoma of the lung W.R. Smythe, E. LeBel, J.E. Bavaria, L.R. Kaiser and S.M. Albelda	229-239
The role of the integrin vitronectin receptor, $\alpha_v \beta_3$ in melanoma metastasis J. Nip and P. Brodt	241-252
Erratum	253-254
Instructions for authors	255-256
Announcement	257

TUMOR HOST INTERACTIONS IN THE METASTATIC PROCESS

Overview

Significance of tumor-host interactions in cancer growth and metastases R.S. Kerbel	259-262
Oncogenes as inducers of tumor angiogenesis J. Rak, J. Filmus, G. Finkenzeller, S. Grugel, D. Marme, and R.S. Kerbel	263-277
Steps in tumor metastasis: New concepts from intravital videomicroscopy A.F. Chambers, I.C. Macdonald, E.E. Schmidt, S. Koop, V.L. Morris, R. Khokha and A.C. Groom	279-301
Trophic factors and central nervous system metastasis G.L. Nicolson and D.G. Menter	303-321
Modulation of tumor cell gene expression and phenotype by the organ-specific metastatic environment R. Radinsky	323-338
The role of fibroblasts in tumor behavior M. Gregoire and B. Lieubeau	339-350
Contribution of tumor and stromal matrix metalloproteinases to tumor progression, invasion and metastasis J.R. MacDougall and L.M. Matrisian	351-362
Adhesion or anti-adhesion in cancer: what matters more? S. Jothy, S.B. Munro, L. LeDuy, D. McClure, O.W. Blaschuk	363-376
Volume contents	377-380
Instructions for authors	381-382
